New confirmed cases of COVID-19 reported by Thunder Bay District Health Unit

Thunder Bay District Health Unit (TBDHU) is reporting 2 (two) new COVID-19 cases in residents in the TBDHU Region.

For additional information on the status of COVID-19 cases in the Thunder Bay District Health Unit area, please visit the [TBDHU Website](#).

Details of confirmed case(s)

Case Number	Age	Gender	Exposure category	Status	Episode Date (dd/mm/yy)	Area
Case #101	30's	F	No Known Exposure	Resolved**	12/08/20	Thunder Bay and Surrounding Areas
Case #102	20's	F	Travel	Self-Isolating	17/08/20	Thunder Bay and Surrounding Areas

*Episode date corresponds to earliest date reported according to following order: symptom onset date, specimen collection date, laboratory testing date, date reported to TBDHU

**In some instances, individuals who are tested as part of routine surveillance activities can have a "weakly positive" test. The status of these individuals can be considered "resolved" soon after it is reported, meaning that the individual was determined not to be an active (infectious) case at the time of the test. This type of result could indicate prior infection with COVID-19. As with every positive test reported to TBDHU, a thorough public health investigation, including repeat testing when warranted, is always done prior to making any status determination.

Visit the [TBDHU Website](#) for more information or contact TBDHU at (807) 625-5900 or toll-free: 1-888-294-6630.

All people who have travelled outside of Canada are directed to self-isolate for 14 days from their arrival in Canada.

The Public Health Agency of Canada posts information on [COVID-19 exposures on flights, cruise ships, and mass gatherings](#).
